ap-singapore is now GA

# ap-singapore is now GA

The Singapore region exited beta on Monday. SLA, latency targets, and on-call coverage are now production-grade. The full list of tenants that moved is in #launch-apac.

## What this means for you

- **Storefront API:** route customers to `ap-singapore` if they're east of the Bay of Bengal. p50 from Sydney drops from 220 ms (to Frankfurt) to 75 ms (to Singapore).
- **Tax & Money:** the Singapore region inherits the existing tax zones; nothing else to do for GST.
- **Platform:** on-call shadow rotation starts next sprint. Sign up at [go/oncall-apac](https://go.oncall-apac).

## What it does not mean

- The catalog is still global; switching a tenant's region requires a real migration.
- No automated cross-region failover. See the [deployment topology](#).

Champagne in the Copenhagen kitchen Friday 16:00 if you're around.
